DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a pair of opposed jaws wherein one jaw is a fixed jaw and the other jaw is a moveable, does not reasonably provide enablement for "a pair of opposed jaws moveable toward and away from each other". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. There is no disclosure of the clamping jaws both being moveable.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 6 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, line 3, the phrase "a bottom surface of the that is concave upward" is not clear.

Allowable Subject Matter

5. Claims 1-4, 7 and 9-12 are allowed.

Art Unit: 3726

6. Claims 6 and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach an apparatus and a method for positioning and holding a golf club for installation of a golf club grip, the apparatus comprising a positioning device with a platen adapted to abut a sole of the golf club head when the golf club is received in the apparatus, the platen being moveable along a second axis lying in a plane normal to the longitudinal axis of the golf club, these in combination with the rest of the limitations in the claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
